> **PING!**

THE WEEKLY NEWSLETTER OF THE IT SERVICES OFFICE

>>> **WHY PING!?**

At this year's Global Leadership Summit (GLS), Kwame Christian offered a simple piece of advice: if your organization doesn't have an interdepartmental newsletter, start one. So we did. Ping! is a fun way to keep everyone on the same page: a weekly pulse check from the IT Services Office with wins worth celebrating, hours, updates, and a little encouragement. If you're reading this, congratulations: the hostname resolved and the connection is alive. Consider this our first successful nslookup().

THE IT SERVICES OFFICE PRESENTS

THE RESIDENCE HALL TOUR

EVERY WEEK

IT HELP DESK

ON TOUR!

Need Tech Help?

1897

3–4 PM · THE MATINÉE

MON: Livingston

TUE: Baker/Roush

WED: Meadows

THU: HUB

6–7 PM · THE EVENING

MON: Miller

TUE: Commuter Lounge

WED: Hardy/Wright

PRINTERS · WIFI · LAPTOPS · PHONES · PRINTERS · WIFI · LAPTOPS · PHONES ·

The tour changes where we are, not when you can reach us. Here is where Paige and Justin will be this semester:

STAFF	OFFICE HOURS	OUT OF THE OFFICE
Paige	7:00 a.m. – 4:00 p.m.	3:00–4:00 p.m., Monday through Thursday
Justin	10:00 a.m. – 7:00 p.m.	6:00–7:00 p.m., Monday through Wednesday; at Huntington University Fort Wayne 11:00 a.m.–6:00 p.m. every Thursday

>>> YOUR ARTICLE HERE

Ping! runs on contributions from within the IT Services Office. Have a tip, a story, a project update, or something the rest of the team should know? We would love to feature it. Send your article — long or short — and we'll slot it into an upcoming issue.

```
$ submit --article --to jsimmons@huntington.edu
> awaiting input from: it-services-staff
```

>>> WHILE TRUE: KEEP GOING

“And let us not grow weary in well-doing, for in due season we shall reap, if we do not lose heart.”

Galatians 6:9 (RSV)

A lot of our work is like maintaining a legacy codebase: the same bugs resurface, the fixes are invisible when they work, and nobody files a ticket to say thanks. Paul's word here is a promise about the release cycle. Well-doing compiles even when we can't see the output, and the harvest ships in due season, on His schedule rather than our sprint plan. So we keep committing: small patches, faithful refactors, one reset password at a time. Don't let the build break because we lost heart before the deploy.
